#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Buell.

Buell discloses a fuel container for engine bicycles comprising a selected section of a hollow frame 26 forming a space for containing fuel, the fuel container having an inlet 44 at an upper end sealed by a cap and an outlet 52 close to a bottom end thereof. wherein the outlet is connected to a fuel duct at an upper end and has a drain port at a bottom end thereof.

## Allowable Subject Matter

3. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose motorcycle frame fuel tanks.
